

Carbon Reduction Plan

Supplier name: Techxi Limited

Publication date: 1 February 2023

Commitment to achieving Net Zero

Techxi Limited is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021	
Additional Details relating to the Baseline Emissions calculations.	
<i>We had no prior reporting of Scope 2 and 3 emissions, these have therefore been estimated based on our understanding of our emissions.</i>	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	1,075.03
Scope 2	0.98
Scope 3 (Included Sources)	5.43
Total Emissions	1,081.44

Current Emissions Reporting

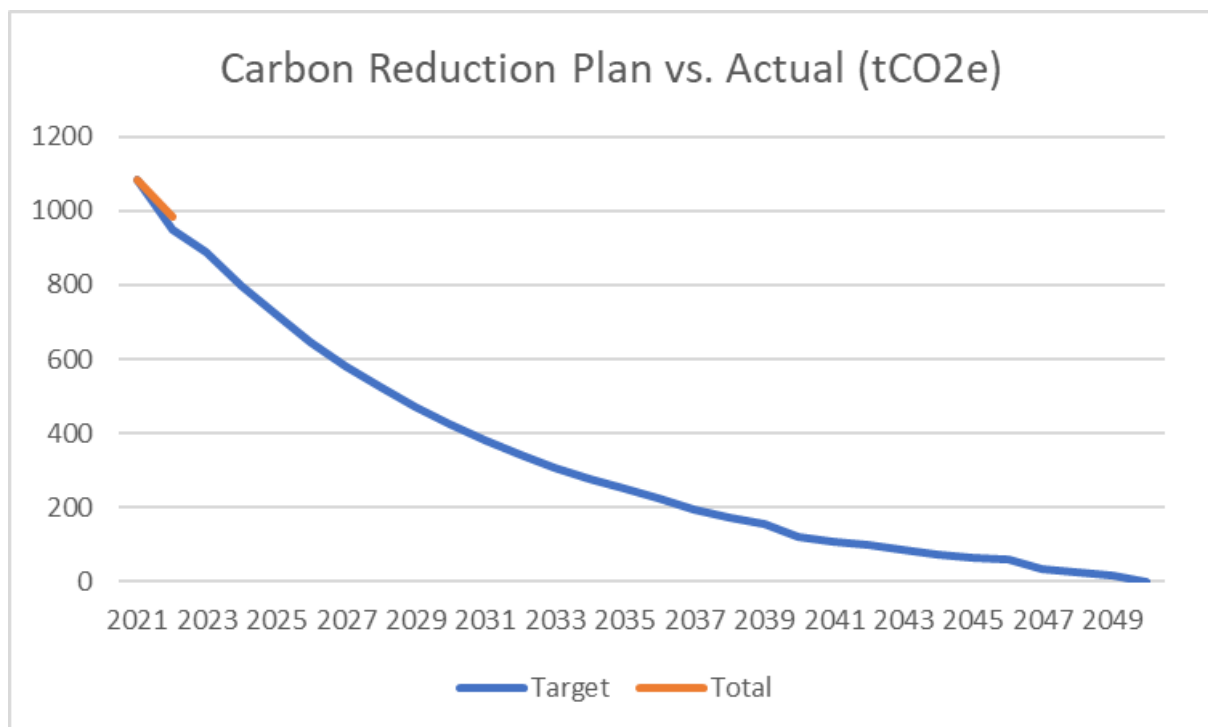

Reporting Year: 2022	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	978.47
Scope 2	0.98
Scope 3 (Included Sources)	5.42
Total Emissions	984.88

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to **581 tCO₂e** by **2027**. This is a reduction of **34%**

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2021 baseline. The carbon emission reduction achieved by these schemes equate to 96 tCO₂e, a 9% reduction against the 2021 baseline and the measures will be in effect when performing the contract.

We have undertaken a fleet renewal programme to remove the most polluting of vehicles and are currently exploring our options with regards to fleet electrification.

In the future we hope to implement further measures such as: A full electrification of our vehicle fleet, as our scope 1 emissions are our most material emissions being a transport provider. We also intend to begin a programme of carbon offsetting should we fall behind in our planned reductions.

We also plan on implementing ISO14011 certification.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

G. Lee
